## XEN-TAN SPRAY TAN TREATMENT ADVICE

**INSTANT OLIVE TONES**

**DRENCHES SKIN WITH MOISTURE**

**BLENDS IN EFFORTLESSLY**

**SMELLS DELICIOUS**

**"5/5 The Best Fake Tan I've ever had"** Love It Magazine

**"There's absolutely no streaking. Seriously"** Body Confidential

**"It smells nice, yes honestly, and will never turn you orange"**

Reveal Magazine

This professional treatment is carefully formulated with olive-undertones and promises the most realistic colour that you will get from an airbrush tan without any orange hues. What's more, the texture is so light it quickly dissolves into the skin, leaving your skin feeling unclogged, soft and silky. To ensure your tan is 100% Flawless, here are some additional hints and tips:

#### **BEFORE YOUR SPRAY TAN**

Have a patch test at least 24 hours before your first XEN-TAN SPRAY TAN Treatment.

The night before your tanning session exfoliate the body paying specific attention to drier areas such as elbows, knees and ankles. For optimum results exfoliate with the XEN-TAN BODY SCRUB to ensure that the solution dyes the layer of skin that is likely to last the longest.

We do recommend that you shave or wax 24 hours before your treatment.

Remove makeup/deodorant prior to a treatment as this can lead to discolouration.

Moisturise the drier areas of the body - hands, feet, knees, and elbows, leave the rest of the body clear from any moisturisers or body sprays etc. These can act as a barrier to the solution.

Your therapist should apply a barrier such as Vaseline to finger nails, palms and toe nails to prevent discolouration, a good tip is also to smear a little Vaseline over the brows, before application.

#### **AFTER YOUR SPRAY TAN**

For best results leave the solution on overnight.

Wear loose dark clothing after your treatment.

Wear loose-fitting shoes, flip flops are often the best option.

Do not exercise or swim whilst the tan is developing.

Do not shower or bathe for a minimum of at least 8 hours.

After showering (hot baths are not advised after a spray tan) - pat the skin dry, do not rub.

Use a superior moisturiser that will prolong the life of your tan as long as possible.

XEN-TAN TRANSFORM will ensure that your colour stays fresh and fades evenly. It's a completely non sticky lotion that smells yummy and feels like...nothing ...on your skin. Ask your therapist for more information.
